DIARY NOTES

DD/S

30 November 1965

2. [REDACTED] advised that Colonel White saw that the Administration Building was empty but that a guard was on duty. He questioned the use of the guard. Charlie advised that there are three safes in the building, contents of which are being inventoried for disposition. One safe was [REDACTED] and one belonged to [REDACTED] There is equipment in the building which needs protection. Arrangements will be made to seal the building and to have alternate inspection. 25X1A

3. Dr. Tietjen gave me a report on the [REDACTED] case and the Medical Staff feel he is not a disturbed individual in a major way; however, he must be given some medical assistance. I shall ask for a status report from the Office of Security. The case does not appear to be a problem, but [REDACTED] has enough personal problems so that his future potential is very limited. He is marginal for our interests. 25X1A

4. Dr. Tietjen advised that [REDACTED] is now symptom free and should be returning to duty. The possibility of a future problem recurring is highly possible but is rather remote as an eventuality. I agreed to call an ad hoc Personnel Evaluation Board meeting to make a decision on [REDACTED] return to duty and assignment. 25X1A
